Introduction	Challenges and difficulties are always the things that stand in the way, causing people to become timid, afraid, and anxious, which leads to turning around and giving up. But there is a place that also contains many challenges and difficulties. And that place is called the Little UK.
QUESTION 1	News, Global Mindset, Method, Presentation, 21st-century skills, Teamwork, Face challenges
QUESTION 2	Personally, I feel that my presentation skills and pronunciation skills have improved significantly because I update and read the news every day. Teamwork and communication skills are also significantly improved. It's all thanks to my training efforts over the past 3 weeks at Little UK. The way I've been able to improve these skills on my own is through effective learning methods coupled with a good learning environment with many activities and interactions between me with friends and teachers. For me, to have an effective study plan, a mature mindset is an indispensable factor.
QUESTION 3	<p>The presentation skills in Thunderbolt are the biggest challenge for me. The actions that I do every day to improve this skill are:</p> <p>1. Every evening, I usually update and read the news. Then summarize and ask questions about the news. Then practice giving the best news according to what I have learned to make the audience understand the content that I am conveying.</p>

| | <p>2. Learn how to speak like a pro based on videos from celebrities on TedTalks. Then note down the skills that you need to apply and then follow them. After doing it once, if it doesn't feel right, then watch the videos and try again.</p> <p>3. In addition to presentation skills, every day I personally spend time improving my body language skills, presentation skills, and eye contact with the audience. From there, combine those skills with presentation skills.</p> |
